• EDUCATION

Master of Design (M.Des)

Interaction Design, 2006 – 2008
IIT Bombay

Bachelor of Technology

Materials Science & Engg., 2002 – 2006
IIT Bombay

Hello! I'm Suri Manekar.

A design partner & product strategist. 18+ years designing enterprise AI, agentic and data-heavy products, most recently ServiceNow's AI Control Tower.

• WORK EXPERIENCE

ServiceNow

Sr. Staff UX Designer Feb 2024 – Present

AI Experience Design: AI Control Tower

- Led end-to-end design of **AI Control Tower**, from an internal tool to a generally available product offering: agent discovery, risk and compliance monitoring, AI spend tracking and a kill switch for rogue agents. **Adopted by 7 C-suite customers.**
- Designed human-in-the-loop interaction models that make autonomous agent behaviour visible, explainable and controllable for IT, security and risk teams.
- Design AI-driven analytics that surface insights automatically: systems that learn, recommend and adapt, rather than dashboards people passively read.

Generative AI Application Design

- Pioneered generative AI applications and led UX for AI-driven tools, integrating them seamlessly into existing platform workflows.
- Partner with product, engineering and data science to define KPIs and turn complex datasets into actionable insight.

Staff Product Designer Mar 2021 – Feb 2024

UX Architect for C-Suite Solutions

- Designed the **CEO Dashboard**, the C-suite's window into how work flows across ServiceNow: a three-pane operating model with zoom from enterprise to function level, later published on the ServiceNow Store.
- Partnered with data scientists and analysts to make analytics platforms powerful and intuitive, grounding decisions in research and cognitive psychology.

ADP

Design Manager Oct 2017 – Mar 2021

- Led a team of **6 designers** on **ADP DataCloud**, the people-analytics product for HR and business leaders.
- Evangelised UX across the organisation by running FF3 design sprints with business and technology teams.
- Drove concept exploration, design strategy and service design for mobile apps and product sites; contributed to ADP's next-generation Smart Recruitment experience.

Microsoft

Sr. UX Designer Jul 2014 – Sep 2017

- UX lead on enterprise customer engagements, from pre-sales and envisioning workshops through ideation to delivery of the full UX journey.
- Designed the **TATA Motors connected-car app**: 35 mobile features including remote commands, vehicle tracking, driving-behaviour analytics and diagnostics.
- Led a cross-functional UX team of designers, developers, analysts and testers; turned research into conceptual models, IA, task flows, personas and wireframes.
- Hired and mentored designers across teams to raise the talent bar.

• CERTIFICATIONS

Certified Usability Analyst

Human Factors International, 2015

Human-Centered Design Practitioner

LUMA Institute, 2023

Claude Ecosystem: Code, Cowork & Design

Build Fast with AI, 2026

Authentic Design, 2016

Technical Presentation Skills

Dale Carnegie Training, 2015

Germin8 Solutions

Head, User Experience Design Aug 2010 – Jul 2014

- Owned product experience across the portfolio, including the flagship **Explic8** social-media analytics platform and its interactive dashboards.
- Ran end-user research, prototype testing, A/B tests and usability testing; created brand identities for every product launch. Clients: Airtel, Asian Paints, MTV, Godrej, ICICI Bank.

Hewlett Packard

Information Architect Jul 2008 – Aug 2010

- IA, wireframes and Axure prototypes for usability testing for Citibank, J.P. Morgan, USGS and Schneider Electric; trained designers in user-centred design.

OgilvyOne

Design Intern Apr – Oct 2007

Interactive campaigns for Vodafone and Cadbury.

• SELECTED WORK

AI Control Tower ServiceNow · Design lead, 0 → 1 to GA

Central hub to discover AI agents, monitor risk and compliance, track spend and stop rogue agents, with people in the loop where it counts.

CEO Dashboard ServiceNow · C-suite analytics

Three-pane operating view from the whole enterprise down to each function.

Explic8 Germin8 · Head of UX

Social-media listening dashboards turning large volumes of conversation into insight.
