• SUMMARY

Principal-level Product Designer and product strategist with 18+ years designing **Enterprise SaaS** and **B2B** products: enterprise AI, agentic and data-heavy experiences. Most recently led design of ServiceNow's **AI Control Tower** from internal tool to generally available product. Brings design leadership, systems thinking and hands-on craft, from C-suite dashboards to AI governance.

• WORK EXPERIENCE

ServiceNow Mar 2021 – Present

Sr. Staff Product Designer Feb 2024 – Present

AI Experience Design: AI Control Tower

- Led end-to-end design of **AI Control Tower**, from an internal tool to a generally available product offering: agent discovery, risk and compliance monitoring, AI spend tracking and a kill switch for rogue agents. **Adopted by 7 C-suite customers.**
- Designed human-in-the-loop interaction models that make autonomous agent behaviour visible, explainable and controllable for IT, security and risk teams.
- Design AI-driven analytics that surface insights automatically: systems that learn, recommend and adapt, rather than dashboards people passively read.

Generative AI Application Design

- Pioneered generative AI applications and led UX for AI-driven tools, integrating them seamlessly into existing platform workflows.
- Partner with product, engineering and data science to define KPIs and turn complex datasets into actionable insight.

Staff Product Designer Mar 2021 – Feb 2024

UX Architect for C-Suite Solutions

- Designed the **CEO Dashboard**, the C-suite's window into how work flows across ServiceNow: a three-pane operating model with zoom from enterprise to function level, later published on the ServiceNow Store.
- Partnered with data scientists and analysts to make analytics platforms powerful and intuitive, grounding decisions in research and cognitive psychology.

ADP Oct 2017 – Mar 2021

Design Manager

- Led a team of **6 designers** on **ADP DataCloud**, the people-analytics product for HR and business leaders.
- Evangelised UX across the organisation by running FF3 design sprints with business and technology teams.
- Drove concept exploration, design strategy and service design for mobile apps and product sites; contributed to ADP's next-generation Smart Recruitment experience.

Microsoft Jul 2014 – Sep 2017

Sr. UX Designer

- UX lead on enterprise customer engagements, from pre-sales and envisioning workshops through ideation to delivery of the full UX journey.
- Designed the **TATA Motors connected-car app**: 35 mobile features including remote commands, vehicle tracking, driving-behaviour analytics and diagnostics.
- Led a cross-functional UX team of designers, developers, analysts and testers; turned research into conceptual models, IA, task flows, personas and wireframes.
- Hired and mentored designers across teams to raise the talent bar.

Germin8 Solutions Aug 2010 – Jul 2014

Head, User Experience Design

- Owned product experience across the portfolio, including the flagship **Explic8** social-media analytics platform and its interactive dashboards.
- Ran end-user research, prototype testing, A/B tests and usability testing; created brand identities for every product launch. Clients: Airtel, Asian Paints, MTV, Godrej, ICICI Bank.

Hewlett Packard Jul 2008 – Aug 2010

Information Architect

- IA, wireframes and Axure prototypes for usability testing for Citibank, J.P. Morgan, USGS and Schneider Electric; trained designers in user-centred design.

OgilvyOne Apr – Oct 2007

Design Intern

Interactive campaigns for Vodafone and Cadbury.

• RECENT WORK

AI Control Tower ServiceNow · Principal Designer / UX Design Lead · 2025–26

One hub to discover, govern, secure and measure every AI asset in the enterprise, modelled on familiar IT assets so admins adopt it with zero retraining.

Launched at Knowledge 2026 · 400+ AI assets tracked · 0 Shadow AI

Digital Control Tower ServiceNow · UX Lead, EBC Presenter · 2024

A glance-first, live view of every critical workflow across functions for CXOs; its visual grammar became the template for 8 other executive dashboards.

20% sales increase influenced via C-suite EBCs · 45+ EBC sessions

Project Gestalt Design enablement using AI · AI Orchestrator, Lead Ideator · 2025

A Claude-powered build skill and AI review portal that put the design system in developers' own workflow, so 450+ Tableau-to-Power BI migrations shipped compliant.

100% design-system adoption · Reviews cut from 48 hrs to 4

AI Agent Mascots ServiceNow AI Agents · Character concept · 2026

A self-initiated character system that gives AI agents a face people will trust, grounded in how design history has earned trust for new technology.

7 agent characters · 4 style directions

Beyond Screens Workshops, teaching & sketchnotes · 2006–ongoing

Design-thinking workshops, guest lectures, sketchnote cohorts, brand identities and visual thinking that makes complex ideas clear.
